

## Index of Subjects

Page numbers preceded by the letter S refer to the Supplement to Volume 27

A 120 (Colchester), slope drainage and water table 314  
 abrasion test 41  
 acidisation, borehole 75-77  
 aerial photography, Tay River (1993) 324  
 Afulilo Falls hydro scheme, faults 277-282  
 aggregate in blemished concrete, chemical investigation 369  
 aggregate crushing value (ACV) 275  
 aggregate impact value (AIV) 41, 275  
 aggregate properties  
   laboratory crushed 25, 29-31, 31-34  
   quarry-produced 31, 33-34  
 aggregate resources  
   analyses techniques 165-191  
   and archives 167-170  
   assessing volumes 184-187  
   criteria for identifying workable 183-184  
   defining resource areas 184-187  
   geophysical surveys 165, 176  
   hydrogeological information 165  
   investigative techniques 167-170  
   mapping 165  
   planning and environmental data analysis 165, 187  
   sampling and laboratory investigations 182-183  
   satellite image analysis 165  
   shell and auger drilling 165  
 Al-Hamadiya, Saudi Arabia 341  
 Al-Hamma, Saudi Arabia 341  
 Al-Hassa, Saudi Arabia 335, 338, 340, 341, 343, 345  
 Al-Jesh, Saudi Arabia 340  
 Al-Khars, Saudi Arabia 340, 341  
 Al-Mansoriya, Saudi Arabia 340, 341  
 Al-Mubarraz, Saudi Arabia 335  
 Al-Nathel, Saudi Arabia 340, 341  
 Al-Qatif, Saudi Arabia 92, 333-347  
 Al-Qatif field test 347  
 Al-Shahik, Saudi Arabia 341  
 Aliakmon Valley, Greece S42-S43  
 alkali-aggregate reaction, Trinidad 363-372  
 American Society for Testing and Materials 1993a 275  
 anhydrite, solubility in saline solutions 269  
 aquifer discharges, Lake Vegoritis S46  
 aquifer recharge, Lower Greensand (Slough) S57-S70  
 aquifers  
   karstic S44-S46  
   partial screening in wells S34-S36  
 Arabian Peninsula, geology 336  
 artesian water pressures 83, 85, 87, 96  
 ASTM C-40 test 369  
 auger-hole tests 376  
 augering, aggregate resources 182  
 Barrow Haven borehole S5  
 Bath Limestone, uniaxial compressive strength and suction 53

blemished concrete 364  
   chemical investigation 369  
   compressive strength 364  
   mineralogy 364-365  
   mortar pat tests 365-367  
   petrography of aggregates 367-369  
   X-ray diffraction of cement matrix 366  
 blended coal tailings  
   compaction characteristics 354, 355-356  
   for construction and rehabilitation 353-361  
   effect of additives on compressive strength 358-359  
   geotechnical characterization 353-361  
   permeability 356  
 block flexure topples, and joints 62, 67  
 block size index 150  
 Blue Mountains (Jamaica), JCRA 243-255  
 borehole acidisation 75-77  
 Bradano catchment 297  
 Braecock Farm, River Tay (1990) 328, 329  
 Brazilian tensile strength 257, 260, 262, 271  
 British granites, undulatory extinction of quartz 69-74  
 bulk density, laterite gravels 41  
 bulldozer manufacturer's handbooks 130  
 Bunter Sandstone, uniaxial compressive strength and suction 52  
 calcareous clays, Eastern Province of Saudi Arabia 333-351  
 calcareous soils pH 340  
 California Bearing Ratios (CBR) 356-358  
 Canada, topples on underdip slopes 57-68  
 capillary suction, sabkha 96  
 Carboniferous Sandstone, strength and suction 54  
 $\text{CaSO}_4\text{-H}_2\text{O}$  system 268-269  
*Caterpillar Performance Handbook* 126, 130, 145, 146, 148  
 Caterpillar Tractor Co 145  
 CBR and moisture content, optimum blended tailings 357  
 CEC (cation exchange capacity) 199, 200, 201, 340  
 Cedros Formation, sands and gravel 367  
 cement and blended tailings, geotechnical properties 353, 358, 359-360  
 cement retardation 368  
 cement treated tailings, and mine access roads 360 Chad Formation S75  
 chalk  
   density-porosity relationship S7  
   dry density S7, S11  
   excess conductivity S7  
   formation factor S7, S8-S9  
   Humberside and Lincolnshire (UK) S5-S12  
   hydraulic conductivity S6, S7  
   hydrogeological properties S5-S12  
   leakage from the overlying (Lower Greensand) S67-S68  
   matrix S5, S7  
   permeability-formation factor relationship S9  
   porosity and formation factor S9

- porosity and permeability S7-S8
- porosity S5, S7-S8, S9, S10
- preparation of samples S5-S6
- saline connate water S68-S69
- stratigraphy and chalk properties S10
- wet density S6, S7
- Chingmei Formation 258
- clay heave, Tricarico 305
- coal tailings, chemical constituents 354
- Columbian cement, and concrete blemishes 364
- concretionary laterite gravels formation 39-41
- conservation problems, geotechnical background 293-307
- constrained modulus, compacted tailings 360
- corrosion
  - of pipelines in sabkha 104
  - of reinforced concrete foundations in sabkha 103
  - and well screen entrance velocity S34
- creep mechanism, volcanic saprolites 211-230
- Crete, Neogene gypsum 267-273
- cyclones, tailing rejects 354
- Dam Formation 336
- Dammam Formation 336
- deep foundations, in sabkha 107-115
- density gradient mixing 117-118
- Department of Transport (DOT) Notes for Guidance (MCHW 2)312
- Derbyshire coalfield 7
- desert roses 87
- desiccation, superficial deep-seated 293
- detritus, edge of pavement drainage 310, 311
- dewatering of lignite mines, radius of influence S50
- diggability index 148
- discontinuity orientation, and excavatability 148
- discontinuity spacing measurements 150
- dispersive soils 195-209
- dongas 203, 204 drain spacing analysis 118
- drainage blankets 315-316
- drift mapping, aggregate resources 170
- dry density, of chalk S11
- Earn and Tay Rivers flooding 319-331
- earthquake damage, Tricarico 299
- earthquakes, and JCRA 251
- electrical conductivity, of groundwater S11
- electromagnetic conductivity surveys, aggregate resources 181
- electron microscope analysis, tailings 354
- embankment breach survey 324
- embankment breaches, Tay and Earn systems 325, 326
- embankment failure, drainage blanket 316
- empirical model, for residual subsidence duration 15, 21-22
- encrustation, well screen S34
- encrusted aggregates 368
- energy dispersive spectrometer system (EDS) 344
- Enfield-Haringey, artificial recharge scheme S3-S4
- envelopes, non-linear shear strength 231-241
- ESCPT tests 89, 104-105
- ESP (exchangeable sodium percentage) 195-196, 199, 200, 207
- Eurocode 7, and retaining structures 315
- evaporation rates, sabkha 95, 96
- evaporative pumping, sabkha 95
- excavatability
  - assessment systems 148
  - discontinuity spacing 150-151
  - equipment since 1971 146-148
  - excavation methods 146-148
  - geomorphological setting 154-155
  - graphical method for assessing 145-164
  - strength measurements 151
- exchangeable cations, soil samples 341
- expansive clays, Eastern Province of Saudi Arabia 336
- fabric, laterite gravels 44, 45-49
- Fenomarker stations 7
- Fiat Allis handbook 130
- fin drain 311, 315, 316
- finite element model, Komnina sub-basin S47
- fixed-ring oedometer swelling tests 344-346
- floatation cells, tailing rejects 354
- flood embankment breaches, Tay and Earn Rivers 319-331
- flow model, Komnina sub-basin S46-S48
- Fookes, Dearman & Franklin method 145
- formation factor, chalk S11
- Fossa Bradanica complex 295
- Franklands Village landslide 289-292 Franklin, Broch & Walton method 135, 145, 148
- Gault Clay embankments, pore pressures 314
- Gault Formation, extent and lithology S58
- geochemistry, laterite gravels 44, 45-49
- geodetic survey, Tricarico 301
- Geological Society Engineering Group Working Party (aggregates) 275
- geomorphological mapping, aggregate resources 170-176
- geophysical surveys, aggregate resources 176
- geostatistics, hydraulic conductivity 380-381
- geotextile design criteria (drains) 316
- GFR (Geological Factor Rating) 148
- Gibraltar
  - aquifer testing S27
  - chloride balance, rainfall and recharge S24
  - climate S17
  - conductivity logs S26
  - geological map S19
  - geological structure S20-S23
  - geology S19-S23
  - groundwater S23-S24
  - hydrochemistry S26
  - hydrogeology S23
  - hydrological studies S15-S28
  - piezometry S26-S27
  - pollution of groundwater S27
  - solution of carbonate rocks S25
  - tidal effects on groundwater levels S25-S26
- glacial and glaciofluvial landforms 171, 172
- Goxhill Haven borehole S5

- granites  
   suitability as concrete aggregates 36-37  
   undulatory extinction of quartz in British 69-74  
 granitic aggregates, Hong Kong 25-38  
 granitic rock types, suitability as concrete aggregates 34-37  
 granodiorite, Hong Kong 36  
 graphic method, for assessing excavatability of rock 145-164  
 gravel pack, wells S33  
 Greece (Macedonia), groundwater lowering S41-S54  
 ground investigations, Eastern Province of Saudi Arabia 336-338  
 ground movements, mining activated 7-14  
 ground uplift (upsidence) 8  
 groundwater conductivity, chalk S5  
 groundwater hydrology (Manga Grasslands, northeast Nigeria) S73-S82  
 groundwater recharge, Gibraltar S23-S24  
 groundwater rising, Eastern Province of Saudi Arabia 335  
 groundwater table lowering, in lignite mining S41-S54  
 Guay breach 325, 329, 330  
 gypsiferous bio-micrites 267  
 gypsum, solubility 269, 270-271  
 Hadjigeorgiu and Scoble method 134  
 Hadruk formation 87-88, 95, 336  
 heave prediction, Eastern Province of Saudi Arabia 347-349  
 Heraklion gypsum, geology 267  
 highway drainage  
   filter criteria 312  
   flow criteria 312  
   slope drainage 312-315  
   TRL research 309-317  
 Hofuf Formation 336  
 horizontal displacement, three-dimensional ground movements 10-11  
 Hsinchuang Formation 258  
 hydraulic gradient, Komnina - Mt Vermion S44-S46  
 hydraulic conductivity  
   chalk S5  
   geostatistics 380-381  
   of tropical residual soils 375-281  
 hydraulic conductivity determination  
   auger-hole tests 367  
   grain size analyses 367  
   infiltration methods 376, 377-378  
   piezometer tests 367  
 hydraulic gradient, western Vermion aquifer S53  
 hydrogeochemistry, Lower Greensand S63-S66  
 Immingham borehole S5  
 inclined seam, residual subsidence movements due to mining 15, 19-20  
 International Association of Engineering Geology  
   Commission on Engineering Geological Mapping 245  
 International Association of Engineering Geology  
   Commission on Landslides 245  
 inverse auger-hole test (Porcher method) 376-377  
 lowa pore index test, laterite gravels 41  
 iron oxide impregnation, in aggregates 367, 368  
 ISRM (1985) specifications 271  
 Janbu procedures 236  
 JCRA (Judgement Cliff rock avalanche) 243, 244, 247  
   environmental impact 253-254  
   failure sequence 252-253  
   geological framework 245-246  
   geometry of the avalanche 248-249  
   geomorphic framework 245  
   H/L against volume 254  
   kinematics 251-252  
   morphology 252  
   nature and composition of the deposit 250-251  
 jet grouted soilcrete  
   Brazilian tensile strength 260  
   compressive strength and P-wave velocity 264  
   compressive and tensile strengths 260-262  
   failure strains and dry density 261  
   ground conditions 258-259  
   jetting parameters 259  
   mechanical properties 257-265  
   Poisson's ratio and dry density 263  
   tensile strength and dry density 262  
   ultrasonic pulse velocity 260  
   uniaxial compressive strength 259-260  
   and depth 261  
   and dry density 261  
 joint spacing ratios, topples of underdip slopes 67  
 Jubail (Saudi Arabia), geotechnical aspects of sabkha 83-120  
 Judgement Cliff rock avalanche (JCRA) *see* JCRA (Judgement Cliff rock avalanche)  
 Kajemarum Oasis  
   aerial photograph interpretation S78  
   effective rainfall S80-S81  
   electrical resistivity soundings S78  
   estimated recharge S81  
   groundwater sampling points S77  
   and piezometers S77  
   radial throughflow S81  
   renewable groundwater resources S82  
 karstic aquifers (Macedonia), iso-piezometric countours S44-S46  
 Kirsten method 134, 145, 148  
 Knossos Palace (Crete) 273  
 Komatsu bulldozers 131  
 Komnina lignite field S31-S42, S47  
   dewatering, radius of influence S50  
   dewatering operations S49-S53  
 Komnina sub-basin  
   finite element model S47  
   flow model S46-S48  
   hydrogeology S44-S46  
   iso-piezometric contours in the Karstic aquifer S43, S44, S45  
 laboratory-produced aggregates 25, 29-31, 31-34  
 landforms, criteria for recognition 171, 172  
 landslides

- Franklands Village 289-292  
 Hong Kong 211-212  
 groundwater behaviour 215-216  
 and low permeability zone 228  
  
 and radio-transmission-warning systems 367  
 Scarborough 3-6  
 tropical residual soils 375-281  
 laterite gravels  
 abrasion and aggregate impact tests 41  
 of aggregates 39-50  
 bulk density and specific gravity tests 41  
 fabric 44  
 geochemistry 44  
 Iowa pore index test 41  
 petrology and fabric of 39-50  
 specific gravity 41  
 water sorption test 41  
 lignite open-cast mining, groundwater table lowering  
 S41-S54  
 lime and compressive strength, blended tailings 358  
 line of thrust, and factor of safety 238  
 London Clay, long-term pore pressures, retaining walls  
 315  
 Los Angeles Abrasion Value (LAHV) 275  
 Lower Greensand  
 age of water S69  
 extent and lithology S57-S58  
 groundwater from storage S66  
 hydrochemical changes S69-S70  
 hydrogeochemistry S63-S66  
 leakage from the overlying chalk S67-S68  
 piezometry S63  
 quality of water S64  
 recharge from outcrop S66-S67  
 saline connate water removal S68-S89  
 upper surface S61-S62  
 water abstraction S62-S63, S66-S67  
 Lower Greensand aquifer, recharge mechanisms S57-  
 S70  
 Lower Greensand boreholes, historic water levels S63  
  
 M40 Motorway, Denham (UK) 309  
 Macedonia (Greece), groundwater lowering in lignite  
 mining S41-S54  
 Magnesian Limestone, uniaxial compressive strength  
 and suction 55  
 Manga Grasslands  
 aeolian sand aquifer S76  
 climate S76  
 dead oases S74  
 desertification S73  
 dunefields S73  
 geology S75-S76  
 hydrology S75-S76  
 landforms and soils S73-S74  
 playas (active oases) S73  
 soils S73-S74  
 matrix, of chalk S5  
 Meikelour breach, Tay (1993) 326-327, 329  
 microscopical examination, aggregate in blemished  
 cement 368  
 mineralogy, non-indurated lateritic soils 39  
 Minty and Kearns method 133, 148 monzonite (Hong  
 Kong) 36  
 Mt Vermion aquifer  
 recharge S48  
 transmissivity S48-S49  
  
 natron S74  
 Neogene gypsum  
 alterability with heat 270-271  
 bulk unit weight 269  
 crystal size and geotechnical properties 267-273  
 engineering characteristics 272  
 formation 267  
 hardness 269-270  
 point load strength 271  
 slake durability index 269  
 specific gravity 269  
 tensile strength (Brazilian test) 271  
 unconfined compressive strength 271  
 Young's Modulus 271-272  
 non-linear shear strength envelopes 231-241  
 power curve fitting accuracy 235  
 slope stability analysis 235-236  
 North Lantau, engineering geology 283-284  
 Notes for Guidance, Specification for Highway Works  
 (MCHW 2) 310  
  
 oasis hydrology, conceptual model S78-S81  
 oedometer swell test, Eastern Province of Saudi Arabia  
 348  
 organic-iron complexes  
 absorption-exchange reactions 371  
 in aggregates 369  
 origin and occurrence 371  
 podsolization 371-372  
 organometal complexes 369  
  
 pavement edge drainage, combined filter drains (Den-  
 ham) 310  
 petrography  
 laterite gravels 44, 45-49, 50  
 saprolitic soils 219-223  
 petrology, and fabric of laterite gravels 39-50  
 piezometer tests 376  
 piezometers, in embankments 309  
 piezometry, Gibraltar S26-S27  
 pinhole test 198  
 pipelines, corrosion in sabkha 104  
 Piper plots of groundwater chemistry S27  
 piping, dispersive soils 203, 204, 207  
 pitting, aggregate resources 182  
 plasticity chart, clay minerals 340  
 podsolization 371-372 Porcher method (inverse auger-  
 hole test) 376-377  
 pore pressures  
 Denham 309  
 Gault Clay embankments 314  
 porosity  
 chalk S5, S7-S8, S9, S10

- of laterite gravel aggregates 39
- Portland Limestone, uniaxial compressive strength and suction 53
- power curve
  - fitting to Mohr circles 233–235
  - shear strength envelopes 232
- Ptolemais basin, Greece S41, S42, S44
- quarry-produced aggregates 31, 33–34
- quartz
  - age and undulatory extinction of British 70–71
  - reactivity 71–73
  - undulatory extinction 69–74
- radio-transmission-warning systems, and landslides 367
- reinforce concrete blemishes 363, 364
- reinforced concrete foundations, corrosion 103
- residual subsidence duration 20–23
- residual subsidence movements, UK coalfields 15–23
- resistivity surveys, aggregate resources 176–181
- retaining structures failure 315
- retaining walls (London Clay), long-term pore pressures 315
- retarding agents 369
- rippability
  - bulldozer factors 135
  - definition of terms 141–144
  - effect of block shape and orientation 152
  - multi-variable regression analysis 134–138
  - prediction of 130–133
  - productivity vs ease of ripping 127
  - productivity vs predicted productivity 135
  - productivity vs seismic velocity 128, 129, 131
  - productivity vs unconfined compressive strength 127, 128, 129–130
  - rating methods 133
  - of rocks 123–144
- ripping
  - and geological database 123–125
  - and geotechnical database 123–125
  - identification of difficulty 139
  - laboratory data 124–125
  - productivity assessment 125–127
- ripping data 124, 127–130
- rock, revision of the graphical method for assessing excavatability 145–164
- rock classification, for subsidence research 22
- rock defects 143, 144
- rock index determinations, granitic aggregates (Hong Kong) 29, 30
- Rock Mass Rating (RMR) 148
- rock mass structure 149
- Rock Quality Designation (RQD) 148
- rock rippability estimation 123–144
- rock strength, effect of suction 51–56
- Romford, drainage of the cutting (London clay) 312
- Rus Formations 336
- sabkha areas, topography 88
- sabkha, Saudi Arabia
  - Artesian conditions 90, 92–94, 103
  - Artesian water composition 90–92
  - cemented deposits 87
  - compressible layers 105
  - corrosion of pipelines 104
  - corrosion of reinforced concrete foundations 103
  - deep foundations in 107–115
  - design 102–117
  - differential settlements of structures 117
  - evaporation and Artesian seepage 94–98
  - formation and persistence 100–102
  - geochemistry 98–100
  - geology and geomorphology 87–89
  - geotechnical aspects 83–120
  - groundwater hydrology 90
  - low density sands 89–90, 104
  - postulated mechanism of formation 87
  - soluble salts 103
  - structures with deep foundations 107–115
  - structures founded on soluble surface layers 115–117
  - vegetated dunes 87
- saline groundwater 83
- salinity probability plots S26
- sand dunes design 102–117
- saprolite soils
  - engineering properties 216–219
  - petrography 219–223
- saprolites, mechanisms of creep 211–230
- SAR (sodium absorption ratio) 196, 207
- satellite imaging, aggregate resources 165, 170
- Saudi Arabia (Eastern Province), swelling behaviour of calcareous soils 333–351
- Saudi Arabia (Jubail), geotechnical aspects of sabkha 83–120
- scanning electron microscopy (SEM) 344
- Scarborough landslide 3–6
- Scoble and Muftuoglu method 133, 145, 148
- screen clogging, wells S33
- screen diameter (wells) 198
- secondary rock breaking 139–140
- seismic surveys, aggregate resources 181
- seismic velocity 125, 143, 148
- Senekal Dam 206
- shell and auger drilling, aggregate resources 182
- Singh, Denby & Egretli method 134, 148
- skimming techniques, water exploitation S17
- slope analysis, non-linear shear strength soils 236–238
- slope drainage 315
  - time lags 313
  - water table response 313, 314
- slope drainage objectives 316
- slope stability analysis, non-linear shear strength envelopes 231–241
- Slough (Lower Greensand), aquifer recharge S57–S70
- Smith method 133
- soaked CBR, optimum blended tailings 358
- soil
  - fabric 341
  - mineralogy 341
- soil parameters and factors of safety 238
- soil plasticity chart, Eastern Province of Saudi Arabia 338

- soil properties, Eastern Province of Saudi Arabia 337
- soil suction tests 338, 348, 349
- soils, thermal analysis 343-344
- South Africa, dispersive soils 201-203
- Spanish cement, and concrete blemishes 364, 367
- specific capacity, effect of screen diameter S36
- storage reservoirs, Gibraltar S17
- storativity, of Mt Vermion aquifer S48
- strain development, three-dimensional ground movements 10
- stratigraphy of chalk, and rock properties S10
- Subsidence Engineer's Handbook* (SEH) 8, 10, 13, 14
- Subsidence Prediction Programme* (SPP) 13
- suction, effect on the strength of rocks 51-56
- Sungshan Formation 258
- swelling clays (Eastern Province of Saudi Arabia) 338-341
- swelling percentage
  - calcareous clays
    - against swell pressures 346
    - against time 346

## Index of Localities

Page numbers preceded by the letter S refer to the Supplement to Volume 27

Afulilo, Western Samoa 279, 280  
Agecroft, Lancashire (UK) 19  
Al-Qatif, Saudi Arabia 92, 333-347  
Australia, New South Wales 123-144, 354

Bahrain Island 92  
Ballathie, Scotland (UK) 322  
Basilicata Province, Italy 294  
Blue Mountains, Jamaica 243-255  
Braecock Farm, Scotland (UK) 325, 328, 329  
Burnham (UK) S69

Canada (Alberta), Highway Pass 57-68  
China, The Republic of 257  
Colchester (UK) 314-315, 317  
Crete, Greece 267-273

Denham, M40 (UK) 309, 310  
Derbyshire Coalfield (UK) 7

Earn River, Scotland (UK) 319-331  
Eastern Province, Saudi Arabia 333-351  
Enfield-Haringey (UK) 53-54

Fiji 375, 378, 381  
Franklands Village, West Sussex (UK) 289-292

Gibraltar S15-S28  
Greece 267-273, S41-S54  
Guay, Scotland (UK) 325, 329, 330

Harbury-Kineton, Warwickshire (UK) 177, 187  
Heraklion, Crete 267  
Hong Kong 25-38, 211-219, 227-230, 283-284  
Humberside (UK) S5-S12

Italy, Tricarico 293-307

Jamaica, West Indies 243-255  
Jubail, Saudi Arabia 83-120  
Judgement Cliff, Jamaica 243-255

Kajemarum Oasis, Northeast Nigeria S77, S78-S82  
Killinghome (UK) S10  
Knossos Palace, Crete 273 Komnina Field, Greece S41-S42, S43, S44, S47, S49, S53

Laviano, Italy 297  
Lesotho 155  
Lincolnshire (UK) S5-S12  
Llandewey, Jamaica 245

Macedonia, Greece S41-S54 Maidstone (UK) 316, 317  
Manga, Northeast Nigeria S73-S82  
Meikelour, Scotland (UK) 327, 328

New South Wales, Australia 123-144, 354  
Nigeria 39-50, S73-S82  
North Lantau, Hong Kong 283-284  
North Wales (UK) 166, 181, 182, 183, 184, 185

Orange Free State, South Africa 206, 207  
Oropuche River, Trinidad 370

Port of Spain, Trinidad 363  
Ptolemais, Greece S41, S42, S44, S48

Queensland, Australia 354

Ramsgate, Natal (South Africa) 207, 208  
Romford (UK) 312, 313-314

Saudi Arabia 83-121, 333-351  
Scarborough (UK) 3-6  
Scotland (UK) 319-331  
Shirland Colliery (UK) 16  
Shrewsbury (UK) 166, 182, 185  
Slough, England (UK) S57-S70  
South Africa 201-203, 206, 208  
South Wales (UK) 167, 173-176, 182, 184, 185  
Stoke Newington (UK) 53-54  
Swanley (UK) 311

Taipei, Republic of China 257  
Tay River, Scotland (UK) 319-331  
Teifi Valley (UK) 173  
Tricarico, Italy 293-307  
Trinidad 363-372

United Kingdom 7, 15-23, 165-192, 289-292, S5-S12, S57-S70  
Upolo, Western Samoa 277-282

Vegoritis Lake, Greece S46, S47, S50, S51, S53 Vermion Mt, Greece S44, S48, S53  
Viti Levu, Fiji 375, 378, 381

Warwick-Leamington (UK) 167, 181, 183, 184, 185  
West Indies, Jamaica 243-255  
Western Samoa 277-282  
Windsor Castle (UK) S61  
Wollongong, New South Wales (Australia) 354  
Wrotham (UK) 311, 317

Yallahs River, Jamaica 243-255
